

# Sculpt & Body LOUNGE

When facial skin has clogged pores, acne, or an oily appearance, many do not think about hydrating the skin. Over 50% of men have dry skin. If men have oily skin or breakouts, they hesitate to put on moisturizer because it seems counter-intuitive. Dehydration can cause breakouts to happen. Therefore, a facial can not only moisturize the skin, but it can be helpful to educate men on how to properly balance the skin without fear of acne or clogged pores.
